

## LGBTQ+ Youth Health Disparities

Presented by Philip T. McCabe CSW, CAS, CDVC, DRCC

Lesbian, Gay, Bisexual or Transgender individuals have faced a variety of challenges in seeking healthcare. Sexuality minority individuals are often underserved or subject to inequitable or discriminatory practices in health care. They can also be reluctant to disclose their sexual orientation, behavior, gender non-conformity, or same sex relationship status with providers based on previous experiences with heterosexism, judgment, discrimination, alienation or mistrust.

Through this forum, participants will learn the complexity of sexual identity and gender expression in working with LGBTQ+ individuals, especially youth.
