**COST & PRICING ANALYSTS:** Cost and Pricing Analyst will be responsible for cost estimating and other forms of pricing activities in support of various business proposals. This position will incorporate estimates from Functional Groups into pricing templates and prepare cost positions for negotiations

**MECHANICAL ENGINEER:** The Mechanical Engineer is responsible for designing products to meet customer's requirements including all design, functional, material, and test requirements from the customer's component and sub-tier specifications. The specific assignments and responsibilities will be consistent with the level of experience of the engineer.

**PROGRAM MANAGER:** Program Manager leads multiple, concurrent development programs through proposal, funding, development, qualification and volume production. The program manager coordinates and influences internal engineering, operations, business development, finance and contracts teams. Program Managers perform project planning, progress measurement, scope control, and ensure execution to goals through financial and program based milestones.

**ASSEMBLY & TEST TECHNICIAN:** The A&T Tech I primarily works in processing pneumatic, hydraulic, mechanical, and electromechanical assemblies for Space, Navy, and/or Aircraft applications. This role assists in the assembly and test of production hardware and their subassemblies, in accordance with schematics and other written and/or verbal specifications.

We offer a quarterly bonus program along with a full range of top quality benefits and employee services including medical, prescription, dental, vision, life and disability income insurance programs, 401k retirement plans with company match, generous tuition aid program, paid vacation, sick and personal days, 11 holidays, summer hours, on-site credit union and ATM, and much more. We recognize and reward our employee's accomplishments.

## Our Mission

We provide innovative solutions to complex challenges, transforming science and technology into systems and products at the best value for our customers.

## Our Values

**DEDICATED:** We are a dedicated, agile and valued partner delivering world class service and performance.

**CARING:** We are a company that provides employees with opportunities for advancement and encourages collaboration.

**RIGOROUS:** We work diligently to design, develop, and manufacture reliable systems and test them thoroughly at an accelerated rate.
